

Safety Netting

DESIGN

Our team of designers creates engineered safety net projects that prioritise public safety and are visually spectacular. They can provide protection for remedial works as well as shade or waterproofing.

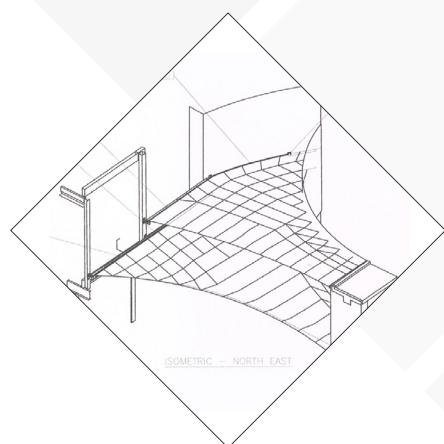

FABRICATE

Solutions can be lightweight, require no drilling, reach places hoarding cannot, and be approved by Roads and Maritime Services (RMS).

INSTALL

Our cost effective solutions can be purchased or hired. We deliver quick turn-around with proven project management systems.

THE FABRIC OF EVERY DAY

Fabric has been part of the human story since the beginning of history.

It's part of every day life: it shades children at school, protects construction sites, provides the backdrop to events and can be elevated to an artwork.

Fabric is the heart and soul of Pattons. We design, fabricate and install award-winning architectural solutions. We're proud our creations enhance the work and lives of our clients, every day.

OUR ETHOS

Our solutions are fully engineered, and our business is fully accredited. Our work maximises safety and longevity.

We push the boundaries of design by investing in innovation, and nurture our talent to make sure we're ahead of the curve.

Consultation comes first, and then we work to create solutions that exceed expectations.

Our systems are advanced, and dedicated project managers work within your strict parameters.

We have deep connections to industry and are accredited members of Specialised Textiles Association (STA).

Our work wins awards, including six national STA awards for excellence and innovation since 2007.

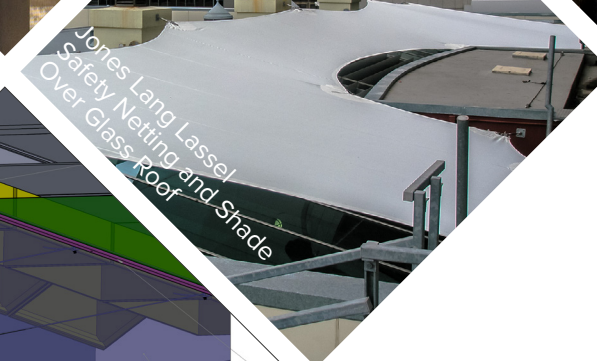

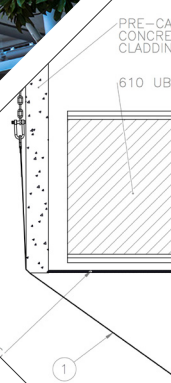

We're a local business that thinks global, established in 1953, with operations based in Sydney, and clients all over the world.

We love what we do, and this passion shows in the quality of our work. We strive for excellence on every project.

ITONS.

ITONS.
